

Aamir Malik Zameer

Project Manager — Operation & Maintenance | Facilities Management | Contract & Business Development

Jeddah, Saudi Arabia | +966 57 426 8856 | shaikaamirmalik25@gmail.com | [linkedin.com/in/aamirzameer](https://www.linkedin.com/in/aamirzameer)
SCE Licensed Engineer #317164 | Iqama Transferable

PROFESSIONAL SUMMARY

SCE-licensed Project Manager with 13+ years of experience across O&M, facilities management, defence and healthcare projects in Saudi Arabia. Proven record overseeing SAR 50M+ contracts delivered on time and under budget, leading multidisciplinary teams, and maintaining zero-injury safety compliance. Skilled in O&M contract execution, cost analysis, client relationship management, tender and RFP support, and technical and commercial proposal coordination. Open to remote, hybrid and on-site roles worldwide — project management skills transfer across healthcare, facilities, construction, industrial and technology sectors; equipped for distributed work with CMMS, BI dashboards, MS Project, AI-driven reporting and multinational stakeholder management across time zones.

CORE COMPETENCIES

O&M Project Management

Facilities Management

Tender & RFP Support

Technical & Commercial Proposals

Cost Analysis & Margin Optimisation

Contract Negotiation & Compliance

Business Development Support

Client Relationship Management

Budget Management & KPI Reporting

Preventive & Predictive Maintenance

CMMS (IBM Maximo)

Building Automation Systems

Risk Assessment & Mitigation

Regulatory Compliance (OSHA, HIPAA, NFPA, Saudi Building Code)

Vendor Management & Procurement

Energy Management & Sustainability

PROFESSIONAL EXPERIENCE

Project Management Engineer — Zahran Facilities Management (KSAU-HS), Jeddah

- Manage and oversee O&M operations for a 500,000+ sq ft healthcare facility, ensuring contract compliance, Joint Commission standards and zero safety incidents across 800+ daily occupants.
- Lead project teams and monitor operational performance, achieving 98% uptime for critical medical infrastructure and a 35% reduction in emergency repairs.
- Analyse project costs and manage an SAR 8M+ annual O&M budget, delivering projects 12% under budget and reducing energy costs by 22% through building automation systems.
- Negotiate with multinational vendors (Mitsubishi Electric, MTU, CAT, Atlas Copco) and secure 20% cost reductions, directly improving project profitability.
- Prepare and review O&M performance reports for senior management, tracking budgets, KPIs, preventive maintenance schedules and client feedback.
- Build and maintain client relationships, supporting contract retention and expansion through consistently client-oriented results and NGHHA appreciation recognition.

Senior Project Engineer — Nesma United Industries (King Abdul Aziz Medical City), Jeddah

- Delivered flagship O&M and capital projects valued at SAR 50M+, maintaining 100% on-time completion and 15% under-budget performance.
- Acted as key technical liaison with NGHHA Technical Affairs, strengthening client trust and securing multiple excellence certificates.
- Negotiated complex contracts and ensured compliance across multinational OEM networks from Germany, Japan and the USA.

- Monitored project costs, schedules and resource allocation to achieve targeted margins and reduce system downtime by 28%.
 - Championed regulatory compliance by securing all permits and aligning with quality, health, safety and environmental standards.
- Engineer — Hindustan Aeronautics Limited (HAL), SU-30 Defence Programme**
- Supported mission-critical defence aircraft programmes with stringent contract management, risk assessment and quality and safety compliance.
 - Executed technical and operational excellence under international collaboration protocols, earning national safety awards and recognition.
